

Project Overview

Title: Enterprise Business Intelligence Framework

Project Type: Digital Transformation Initiative

Project Sponsor: CEO

Project Lead: Data & BI Analyst

Business Background

The organization is operation across multi-business sectors. As business has expanded, reporting practices have evolved independently across departments and business units, resulting in fragmented reporting, inconsistent KPIs definitions, and increasing reliance in manually prepared spreadsheets.

To support the organization digital transformation initiative, this project was initiated to establish standardized reporting, improving data quality, and enable trusted enterprise-wide performance management.

Project Purpose

Design the foundation of an Enterprise Business Intelligence Framework that standardizes reporting requirements, establishes consistent KPI definitions, and provides executive management with trusted information to support strategic decision-making.

Project Objectives

- Understand the organization's business model and operational structure.
- Discover executive and departmental reporting requirements.
- Standardize KPIs definitions.
- Establish reporting governance and KPIs ownership.
- Create a scalable foundation for future business intelligence reporting and analytics.

Project Scope

- Business discovery
- Stakeholder engagement
- Business process understanding
- Reporting requirements gathering
- Business question identification
- Enterprise KPI framework
- Reporting governance

- Data quality requirements
- Executive reporting framework

Expected Business Outcomes

- A standardized enterprise reporting framework.
- Consistent KPI definitions across business sectors.
- Improved confidence in organizational reporting.
- Reduced reliance on manual reporting processes.
- A trusted foundation for executive performance monitoring.
- Better strategic decision-making is supported by reliable data.

Success Criteria

The project will be considered successful when:

- Executive reporting requirements are fully documented and approved.
- Enterprise KPIs are standardized and governed.
- Reporting requirements are traceable to business objectives.
- A unified reporting framework supports all business sectors.
- Executive management has a clear foundation for trusted, data-driven decision-making.
