

Project Overview

Version	1.0
Status	Draft
Phase	Business Discovery & Requirements Gathering
Prepared By	Ahmed Maganza – Data & BI Analyst
Date	3/7/2026

1. Purpose

The purpose of this Business Requirements Specification (BRS) is to document and consolidate the business, reporting, and analytical requirements identified during the stakeholder discovery phase.

The document serves as the foundation for the Enterprise Business Intelligence Framework and will guide subsequent phases including Business Process Discovery, KPI Framework development, Data Discovery, Data Preparation, Business Analysis, and Executive Reporting.

2. Business Context

The organization operates across three primary business sectors:

- Hospitality
- Contracting
- Trade & Retail

Although each sector operates independently, executive management requires standardized reporting and consolidated business performance visibility across the enterprise.

3. Stakeholders Discovery

Stakeholder Group	Participants
Executive Management	CEO, CFO, COO
Sector Management	Hospitality Director, Contracting Director, Trade & Retail Director
Department Management	Finance, Sales, Operations, Procurement, HR, Marketing, Customer Service, Project Management

3. Business Requirements

ID	Requirement Name	Business Need	Business Value	Primary Stakeholders
BR-001	Enterprise Performance Visibility	Provide executive management with a consolidated enterprise-wide view of business performance across all sectors.	Enable strategic decision-making through standardized enterprise reporting.	CEO, COO
BR-002	Financial Performance Management	Provide standardized financial reporting to monitor profitability, budgeting, cash flow, and financial performance across the organization.	Improve financial planning, governance, and decision-making.	CFO, Finance Manager
.....				
BR-014	Commercial Performance Management	Provide reporting and analysis of sales performance, customer behavior, product performance, and commercial activities.	Support revenue growth and commercial decision-making.	Trade & Retail Director, Sales Manager, Marketing Manager

4. Current Reporting Challenges

Challenge	Business Impact
Manual reports preparations	Delayed reporting and increased efforts.
Inconsistent reporting format	Difficult comparisons and consolidation across sectors and departments.
Multiple data sources	Reduced confidence in reported information
Lack of standard reporting	Different interpretations of business performance
Limited enterprise-level visibility	Executive management lacks a consolidated view
Reactive reporting	Decisions are often made after issues have occurred
Limited analytical capability	Reports explain what happened but not why

5. Reporting Requirements

Reporting Requirement	Primary Stakeholders
Enterprise performance reporting	Executive management
Financial reporting	CFO, Finance
Operational reporting	COO, Operations
Hospitality performance reporting	Hospitality management
Contracting project reporting	Contacting management
.....	
HR reporting	HR

6. Business Performance Analysis Requirements

Analysis Requirement	Business Purpose
Trend Analysis	Monitor performance over time
Variance Analysis	Compare actual performance against targets or budgets
Root Cause Analysis	Explain performance changes and operational issues
Comparative Analysis	Compare sectors, business units, branches, or projects
Exception Analysis	Identify unusual performance requiring management attentions

Forecast Analysis	Support planning and future decision-making
-------------------	---

7. Business Constraints and Assumptions

- Reporting should be based on validated and trusted enterprise data.
- Business terminology and KPI definitions should be standardized across sectors.
- Existing reporting processes should be assessed before automation.
- Data quality issues should be resolved before executive reporting.

8. Business Requirements Summary

The stakeholder discovery phase identified a common need for:

- Standardized enterprise reporting
- Trusted and consistent business data
- Cross-sector performance visibility
- Reduced manual reporting
- Stronger analytical capabilities
- Timely information for decision-making
- Actionable business insights and recommendations

These requirements establish the business foundation for the Enterprise Business Intelligence Framework.

9. Next Phase

These approved business requirements documented in this specification will guide Phase 2 (Business Process Discovery).
